Title	**Full-stack Javascript Developer**
Context	Young high-tech, high-growth startup, seeking talent for critical roles to compete in the global market of pervasive wireless networking.
Location	Milan
Duration	Full time employment contract

Founded in 2010, the Milan-based startup Tanaza (www.tanaza.com) developed and brought to market the first and only multi-vendor software for cloud management of WiFi Access Points and social hotspots. Since then our customer base and team have been growing at a rapid rate.

This is an exciting opportunity to work for a young and energetic start-up company with global customers.

JOB SUMMARY

The candidate will work in the Tanaza R&D Team in order to develop cloud-based applications, using the latest cutting-hedge frameworks.
