

SUPERPOWERS for your Wi-Fi

Manage your Wi-Fi access points through the cloud

OPERATIONAL EFFICIENCY
RECURRING REVENUE STREAMS
CLOUD-BASED SOCIAL HOTSPOTS

WI-FI MADE SIMPLE

- Zero-touch deployment and provisioning
- Compatible with multiple models and brands
- Single web interface to remote monitor the APs
- Maintenance and remote firmware upgrades
- Simultaneous management of multiple devices in just one place
- Automatic alerts when device goes off-line

One-by-one manual configurations are a thing of the past!

TAKE YOUR PICK

Choose the access point that works best for you.

Or the cheapest one. Or suggest us to support your favorite brand and model.

Tanaza is **vendor-agnostic** and works great with a wide range of access points, indoor or outdoor, desktop or ceiling-mountables, even with POE.

List of supported devices at [Tanaza.com/freedom](https://tanaza.com/freedom)

And for existing networks, no need to replace your hardware!

Freedom to choose

RECURRING REVENUE STREAMS

Unlock incredible commercial opportunities and generate recurring revenue streams by offering:

- Super efficient **cloud management of multi-vendor Wi-Fi access points**
- Real-time **Wi-Fi remote control and configuration**, even for multiple locations
- **Social hotspots** or **coupon-based hotspots**
- Customized branded **splash pages**
- Extremely **detailed user analytics** and **data capture**, promotions, advertising

WITH TANAZA SUPERPOWERS YOU CAN

- CLOUD MANAGE MULTI-VENDOR WI-FI ACCESS POINTS

- Manage from the **web dashboard** all your APs and WLANs, all in one place!
- Build networks with **unlimited number of connected clients**
- Receive email auto-**alerts when devices get disconnected**
- Manage **multiple locations, groups of APs** in networks, placing devices on a **map**
- Create and assign **up to 8 SSIDs per AP** and configure security levels
- Reboot the APs, change passwords, **remotely upgrade the firmwares**
- Set **radio mode and channel** to reduce interference and **adjust the power level**
- Configure **VLANs**, DHCP/Server and NAT
- Change **IP address** settings
- See **real-time statistics**
- **Zero-touch deploy** and easy, quick, remote configure new devices
- Remote turn on/off the **SSH service**, for increased security level
- Control **bandwidth**, abuses, MAC black list
- Seamless upgrade existing networks
- Enrich the stock feature set of the access point

Superpowers for your Wi-Fi

SECURE AND RELIABLE ARCHITECTURE

Security and reliability are guaranteed by the **Tanaza Cloud Infrastructure**, a world class multi-tenant cloud controller, that stores all the information and statistics of the managed APs.

A Tanaza Agent software, loaded onboard/onto the AP, establishes a secure connection between the APs and the Tanaza Cloud Infrastructure, with no need anymore for hardware controllers.

The encrypted management traffic and the clients traffic are completely separated to guarantee security.

Guaranteed security and reliability

SOCIAL HOTSPOT & COUPON HOTSPOT

Become a reseller of cloud-managed social hotspots thanks to the hotspot add-on (available only for SOCIAL LOGIN accounts).

- **Cloud manage your hotspots**, configure them, see detailed analytics
- Provide free hotspots with **social login**:
Facebook, Twitter, Google, LinkedIn, Instagram, Microsoft Live
- **Build and customize splash pages, add your brand/logo on top and advertise!**
- Link to your own splash page or to a 3rd party one
- **Earn Likes on Facebook**
- Display image or video advertisements before giving access to WI-Fi
- Provide coupon-based internet access and monetize your Wi-Fi
- See **super-detailed analytics** about people accessing to the hotspots, their social profiles, their posts and check-ins
- **download users contacts for marketing** purposes!

Customers will love it!
